## **DETAILED ACTION**

### ***Continued Examination Under 37 CFR 1.114***

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 4/18/06 has been entered.

### ***Response to Amendment***

2. The amendment filed 4/21/06 is objected to under 35 U.S.C. 132(a) because it introduces new matter into the disclosure. 35 U.S.C. 132(a) states that no amendment shall introduce new matter into the disclosure of the invention. The added material which is not supported by the original disclosure is as follows: Newly submitted claims 27, 38, and 42, claim the limitation of the diaper is retained at negative pressure within the interior space of the flexible material such that a pressure differential acts upon the flexible material is not supported in the original disclosure. Applicant is required to cancel the new matter in the reply to this Office Action.

### ***Claim Rejections - 35 USC § 112***

3. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the

Art Unit: 3761

art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 27-46 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Newly submitted claims 27, 38, and 42, claim the limitation of the diaper is retained at negative pressure within the interior space of the flexible material such that a pressure differential acts upon the flexible material is not supported in the original disclosure. Additionally claim 27 claims the step of compressing is performed without folding of the disposable diaper and without rolling of the disposable diaper. The disclosure teaches reconfiguring the diaper, which can be folding or rolling, and then compressing the diaper. Therefore, the disclosure does not support compressing without folding or rolling the diaper.
